Horizon Blue Cross Blue Shield of New Jersey Transition Care

Purpose of Transition Care

Transition Care, also referred to as treatment in progress, is a benefit that allows new subscribers and covered dependents to receive medical care by non-participating providers at the in-network benefit level for treatment of an acute injury or illness. Transition care is short term and not intended to replace the regular provisions of the program.

Examples of Medical Conditions that May Meet Transition Care Guidelines

- Women who are pregnant and have had their first pre-natal visit prior to the effective date of coverage
- Acute fracture victims
- Heart attack victims under acute care
- Cancer patients currently undergoing approved chemotherapy or radiotherapy treatment protocols
- Diagnosed terminal illness where life expectancy is less than 60 days
- Members hospitalization at the time of eligibility
- Surgery scheduled in the month prior to coverage effective date

Examples of Medical Conditions that may NOT Meet Transition Care Guidelines

- Routine examinations, vaccinations and health assessments
- Stable but chronic conditions, e.g., diabetes, hypertension, allergies, arthritis
- Minor illnesses, e.g., colds, sore throats, ear infections, bronchitis, strains, sprains
- Long term management of cancer, dialysis, transplants, etc.

Transition Benefit Enrollment Process

All requests for transition care must be submitted in writing. A separate request form must be completed for each condition/provider requested.

Transition Review Process

Upon receipt of the Medical Transition Care Request Form, the Medical Department will review and evaluate the information. Based upon this initial information, the subscriber will be informed, in writing, of the decision in one of three ways.

1. Request for transition care approved for a specific period of time or a specific number of visits.
2. Request for transition care denied.
3. Request for additional information needed before a final decision can be made.

Care rendered by the non-participating providers after the transition period has expired will be paid at the out-of-network benefit level.
