

Patient Protection and Affordable Care Act Preventive Drug List

In accordance with the Patient Protection and Affordable Care Act (PPACA), which is also called health care reform, certain preventive medicines are covered at 100 percent with no member out of pocket cost. All medicines, including over-the-counter items, require a prescription from the doctor and must be provided by a participating retail, or through the home delivery pharmacy.

Below is information about the medicines available. The list of medicines begins on page 2.

A summary of the categories includes:

- Low-dose aspirin to prevent cardiovascular disease for men age 45-79 and to prevent cardiovascular disease and preeclampsia for women age 13-79.
- Generic bowel prep medicines required for the preparation of a preventive colonoscopy screening.
- Generic breast cancer prevention medicines for women age 35 and older.
- Fluoride supplements for children ages 6 months through 5 years old.
- Folic acid supplements for women.
- Statins for primary prevention of cardiovascular diseases in adults: low to moderate intensity statins are recommended for adults who are between the ages of 40-75, have no history of cardiovascular disease (CVD), have one or more risk factors for CVD and have a calculated 10-year CVD event risk of 10% or greater. Lovastatin and pravastatin are covered.
- Smoking cessation: Generic, brand-name with no generic equivalent (single source) and over the counter smoking cessation medicines. The day supply limit applied to these FDA-approved tobacco cessation medicines is 180 days per member per 365 days. Brand smoking cessation medicines that do have a generic equivalent (multi-source) are covered with copayment/cost sharing, or according to your benefit design.
- Routine immunizations for children, adolescents and adults as recommended from the Advisory Committee on Immunization Practices of the Centers for Disease Control and Prevention.
- Iron supplementation for children ages 6 months to 1 year old who are at increased risk for iron deficiency anemia.
- Contraceptives: Generic contraceptives are covered with no cost share. Brand contraceptive products that do have a generic equivalent (multi-source) and brand name contraceptives with no generic equivalent (single-source) are covered with copayment/cost sharing.
- Pre-Exposure Prophylaxis (PrEP) for the prevention of HIV infection.

This list will be reviewed periodically and is subject to change.
